

## Felix Hühnmair is the new VP Sales at Netstal

**(Näfels, December 12, 2023) Felix Hühnmair, an experienced manager from the plastics industry, is taking over as Head of Sales at Netstal. As a new member of the Management Team, he is responsible for global sales in the application-specific business areas.**

Felix Hühnmair is returning to Netstal after 20 years in various management positions in Switzerland and Austria. The plastics technology engineer and qualified sales manager has over three decades of experience in the injection molding industry. From 2017, he headed the Technical Injection Molding division at Engel Austria. As Vice President Sales at Netstal, he reports directly to CEO Renzo Davatz. The latter had led the Netstal sales organization in personal union since spring 2021.

The new appointment to this key position will create an important basis for the targeted growth in the strategic business areas of packaging, PET, closures, and medical technology.

Renzo Davatz: "I am delighted that we have been able to appoint Felix Hühnmair, a well-known and experienced personality, to Netstal. He will enrich and strengthen our team. Together, we will be able to fulfill and communicate the claim of offering our customers maximum production efficiency even better."

Felix Hühnmair already held a position at Netstal from 1997 to 2003. At that time, he was responsible for sales in the Asia and Oceania region as Area Sales Manager.

**Cultivating values, creating value**

Netstal stands for globally leading high-performance injection molding technology. The Netstal brand goes back to our founding site of the same name in the canton of Glarus, Switzerland. We employ over 500 people at our headquarters with production plant in Näfels and in our subsidiaries. We have been part of the KraussMaffei Group since 1992.

We offer manufacturing companies in the packaging industry, beverage industry and medical technology high-performance machines which work extremely efficiently, with absolute precision and maximum reliability. We are continuously developing these solutions and deliberately incorporating innovative technologies. Because we feel jointly responsible for ensuring that our customers produce efficiently and sustainably. That is why we are driving the development of digitalization and the circular economy with our expertise and experience. We have focused our portfolio on performance, precision, and quality. Customers can find Elios and Elion series injection molding machines with clamping forces between 800 and 10,000 kN, the PET-Line preform system for up to 144 cavities, and turnkey system solutions from a single source. Our quality management is certified according to ISO 9001 and our accredited calibration laboratory meets the requirements of ISO/IEC 17025:2017.
