

Nadeem Amin is the new President for Netstal Americas

(Näfels, June 03, 2024) Netstal appoints Nadeem Amin as its new President for the Americas Region, effective June 1, 2024. He will report directly to Netstal CEO Renzo Davatz.

Nadeem Amin joins Netstal with over 30 years of experience in collaborating with customers in the plastics industry. After 25 years in various roles at Husky, he joined Sacmi USA in 2020 as Vice President PET Sales and Business Development.

In his new leadership role, Nadeem Amin will continue to drive market share expansion throughout the Americas Region from the Netstal Technical Center located in Hebron, KY. This technical center currently supports customers with sales, service, and training. His focus will be on maximizing production efficiency for customers in the strategic application areas of PET preform, beverage closures, thin-wall packaging, and medical molding.

Renzo Davatz, CEO Netstal: "We are delighted to have gained an experienced personality in Nadeem Amin. Together with Andreas Lehnhofer, who is responsible for service in the entire Americas region, we have a strong tandem that will drive growth and take customer service to a new level for all our customers.

Nadeem Amin, President Netstal Americas: "It is with great enthusiasm that I join a team renowned for its dedication to delivering top-tier business solutions via the most advanced injection molding technologies in the world. I look forward to collaborating closely with our customers across the Americas, delving into their unique requirements, and developing solutions that drive their success. Together, we will continue to forge a path of innovation and excellence in the industry."

Cultivating values, creating value

Netstal stands for globally leading high-performance injection molding technology. The Netstal brand goes back to our founding site of the same name in the canton of Glarus, Switzerland. We employ over 500 people at our headquarters with production plant in Näfels and in our subsidiaries. Netstal has been part of the Krones Group since 2024.

We offer manufacturing companies in the packaging industry, beverage industry and medical technology high-performance machines which work extremely efficiently, with absolute precision and maximum reliability. We are continuously developing these solutions and deliberately incorporating innovative technologies. Because we feel jointly responsible for ensuring that our customers produce efficiently and sustainably. That is why we are driving the development of digitalization and the circular economy with our expertise and experience. We have focused our portfolio on performance, precision, and quality. Customers can find Elios and Elion series injection molding machines with clamping forces between 800 and 10,000 kN, the PET-Line preform system for up to 144 cavities, and turnkey system solutions from a single source. Our quality management is certified according to ISO 9001 and our accredited calibration laboratory meets the requirements of ISO/IEC 17025:2017.
